8319 8th Avenue South
Seattle, WA 98108**

Topics:

- Employment Opportunities Job Fair
- Small Business & South Park Business
- Outreach Opportunities
- Women & Minority Business
Outreach Opportunities

Project Overview:

Seattle Public Utilities Solid Waste Division is building a new solid waste transfer station. It will be located in the South Park neighborhood in south Seattle next to the existing South Recycling and Disposal Station. The new facility will set a new standard for customer service, efficiency, and flexibility within the city's solid waste system. Phase 1 sitework is underway. Mortenson (design-builder) is scheduled to start Phase 2 in November of 2010. The new transfer station will improve efficiency, capacity, and reliability and also include shorter wait times, safer operations, and better lighting. It also allows for a complete separation between commercial and self-haul traffic. The facility is designed to LEED (Leadership in Energy and Environmental Design) Gold standards.

Project Team:

- Mortenson Construction (design-builder)
- URS Corporation (prime design consultant)
- The Miller|Hull Partnership (architectural design)
- Swift Company (landscape design)
- ReadWagoner (public outreach)
- O'Brien Company (LEED consultant)
- WPA (facility signage)
- Subcontractors: University Mechanical, Valley Electric, and Smith Fire Systems

Trades:

The following trades will be needed (individuals and companies):

- Earthwork & Utilities
- Landscaping & Irrigations
- Metal Fencing
- Concrete Work
- Site Hardscape
- Signage
- Structural Steel
- Metal Siding
- Windows & Curtainwall
- Roofing
